LETTER OF RECOMMENDATION

To whom it may concern:

Associate Professor Jana Moravčíková - University of St. Cyril and Methodius in Trnava

I would like to take this opportunity to highly recommend Associate Professor Jana Moravčíková, for the title of Professor at the University of St. Cyril and Methodius in Trnava.

I know and follow Prof. Moravčíková activities since at least 5 years and I always was impressed by her way of approaching, presenting and discussing research ideas, projects and results. Her scientific productivity is significative and covering different topics of the horticultural area and she is recognized as asset for the international scientific community working on plant biotechnology.

Therefore, to my knowledge, research activities carried out by Prof. Moravčíková can be considered of high originality and innovativeness. The results achieved are having a high relevance in the international scientific sectors. This is demonstrated by the quality of the referred publications. Prof. Moravčíková productivity is demonstrated by the publications, all developed with a high interdisciplinary approach, and by the involvement in many national and international projects, in many cases even as principal investigator. Directly from my knowledge of Prof. Moravčíková research work and from the activities, projects and publications described in the cv., I can confirm a very high overall quality, impact and significance of her research and associated publications. This success is strictly related to her capacity to promote scientific cooperation within different research groups.

I appreciate a lot her intense work demonstrated by the number of undergraduate students hosted in the laboratory, the number of Ph.D. and graduate students she has mentored and followed, the participation and lead of the Postdoctoral Mentoring and Career Building program.

By considering the scientific publications, combined to an intense participation to important national and international conference, the participation to different international and national projects, I can confirm the clear evidence of Prof. Moravčíková scholarly excellence and creativity in the research, instruction and extension programs.

Bruno Mezzetti

Principal Investigator.

Coordinator of COST- iPLANTA and Horizon2020 Breeding Value
